Navigation	**GPS**
Couvertures	**bimini**

Description

Remarks :
More space for more fun. The Fe25 has generous seating room and all the performance of the smaller Fes. If you like extra space and extra touches, the 25-foot Fe25 is the boat that will appeal to you. It is as responsive as the other Fes even though it offers more room for you and all your gear. The Fe25 is for your large family or group and all-day fun on the water. Even with 16 people it won’t feel crowded, thanks to the exceptional storage throughout. Customize it with an optional Roswell or Sewlong Bimini, to go with either your Battle Advance or DropZone Tower, and extend the comfort with the SewLong Surfing Sunshade over the transom. Include a 40-quart Grizzly Ice Chest with your matching Gator Step and you can pack a picnic for a full day on the water. The Fe25 is the boat you want to satisfy those weekend warriors as well as the water sports newbies in your group because waves and wakes can be tailored to individual needs with room for all.

Accommodation :
Seating for up tp 16 persons

Inventory :
STANDARD EQUIPMENT:

DEALER COMMENT:

We are proud to represent the Centurion factory, offering a range of exceptional boats that can be fully customised to suit your preferences. Using our Build a Boat feature, available at (website in contact data)/ you can explore the full range of options and create your perfect design. We would be delighted to personally assist you and provide a bespoke quote tailored to your specific requirements. Please feel free to get in touch with us to start designing your dream boat today.

Mechanical :
HULL DESIGN:
With its 20 degrees of deadrise at the transom, the Opti-V hull displaces more water, before any extra weight is added, while preserving a great rough water ride. At each corner of the transom a flat triangle extends towards bow creating lift along the rear half of the boat for a level running attitude, front to back as well as side to side. Due to this balanced design, the Opti-V Hull enhances fuel economy and provides a much quieter ride than most boats delivering this type of power. With hook built into the rear edge of delta pad, the seated driver can see over the bow while pulling a rider without compromising the waves or wakes thanks to a level running attitude. The hull also deflects rollers, at the bow and transom, so big water can’t spoil your fun. It’s clear the Opti-V Hull delivers the best waves, wakes and ride - in all conditions.

BALLAST:
The Fe25 comes with as many as seven precisely placed ballast locations that, when you combine them all, equals 5150 pounds of ballast. But large ballast capacity isn’t the complete story. We do ballast a little differently by distributing it evenly throughout the boat. This even distribution displaces weight the entire running surface of this 22-foot performance machine, resulting in a longer wave and a balanced running attitude, front to back, with virtually no bow rise to distract the driver. This is the kind of thing we believe makes a huge difference in your experience.
We have a nickname for the available RAMFILL² ballast system. We call it the “Baller.” It’s a nearly maintenance free system that offers 2600 pounds – plus of ballast capacity that fills in 90 seconds. With its four stainless steel two-inch valves (two in two out), anything plastic is eliminated. The large sub-floor tanks extend from the helm to the transom on each side of the lounge. This just adds to the well-distributed ballast placement and helps create longer waves with consistent push from the face to the curl crash. Baller, indeed.

BALLAST STATISTICS:
Max ballast available 5,600 LBS
Bow ballast tank 450lbs
Optional additional bow ballast 500lbs
Optional rear ballast 1,400lbs
Optional transom ballast 450lbs
Sub floor ballast 2,800lbs

ENGINE:
PCM L96 V8 6ltr petrol
5 years or 600 hour warranty
With upgraded engine PCM ZZ6 comes with 1,000 hour and 5 year warranty
