moteur

Modèle	**no Engine**

Description

The Floating dock is a unique concept originated from the need to store and haul out vessels in remote areas. She can also be used in areas where a fixed Jetty or dockside moorin is not possible or in waters with strong currents. The Floating dock can be towed to any location and then form a secure mooring for any yacht that fits her size. Her 4 Spud poles anchor her secure to the bottom and ensure she will not move. The Floating dock can also be equiped with a light weight roof construction to form an indoor water garage for your yacht. The Floating dock has a lifting capacety of 60 tons.

Hans Visser at De Valk Hindeloopen is your go-to contact for any questions. Feel free to give us a call.
